Wilbert Veloz

Tech Lead · Mobile Engineer · Santo Domingo, Dominican Republic

linkedin.com/in/wilbert-veloz · Santo Domingo, DR

SUMMARY

Software engineer and tech lead with 3+ years building mobile experiences for one of the Dominican Republic's most used banking platforms. End-to-end ownership across the full feature lifecycle — from conception and data architecture to UX decisions, backend integration, security controls, and production deployment. Passionate about building systems that are stable, secure, and built to last.

EXPERIENCE

Tech Lead Agile

Banco Popular Dominicano · Full-time · Hybrid

Jan 2023 – Present · 3 years 3 months · Dominican Republic

- Lead an Agile team, defining and scoping features based on product and client needs.
- Produce technical documentation and solve architectural challenges ahead of development cycles.
- Design data architecture aligned with feature and business requirements.
- Track features from conception through backend service readiness, ensuring all security controls are in place.
- Own deployment pipeline across Development, QA, and Production environments.
- Participate in UX/UI decisions based on current backend capabilities and code structure.
- Led the launch of Toke — Banco Popular's payment infrastructure for financial inclusion.

Quality Engineer

Tashi · Full-time · Connecticut, United States

Nov 2021 – Feb 2023 · 1 year 4 months

- Coordinated meetings and test planning across engineering teams.
- Ensured end-to-end quality of features through structured testing processes.

Intern

Tashi · Part-time · Connecticut, United States

May 2021 – Oct 2021 · 6 months

SKILLS

Mobile	SwiftUI / Swift, Kotlin, iOS & Android platforms, cross-platform patterns
Engineering	Data architecture, backend service integration, security controls, CI/CD, deployments
Leadership	Agile / Scrum, technical documentation, risk management, feature planning
Design	UX/UI decision making, user-centered design within technical constraints

PROJECTS

Banco Popular Mobile App

iOS & Android · SwiftUI · Kotlin

Full-featured banking app serving clients across the Dominican Republic. Enables finances tracking, transfers, every type of transaction, reclamations, and account management — without visiting an office.

- Toke — Payment infrastructure feature launched within the app to transform financial inclusion across the Dominican Republic. Contributed to development in App Popular.
